

3 Mega Pixel 360 Degree Panoramic Camera

Incredibly simple to install in your existing network and viewable via local PC or over the internet to smart phone.

This camera stores video and audio footage on its own onboard SD card and can be retrieved when required via your network.

Footage is recorded in fisheye display and the unique software "Unwraps" view to give multiple undistorted images Both real time and in playback.

Aussie Surveillance makes it possible to see back in time without the restrictions of camera angles and blind spots with simple and yet effective software.

Free CMS Software for simultaneous viewing of multiple cameras, both live and record

Our Kit Design For Do it you self-installation with minimal fuss.
